

Dear BA students,

We are now accepting applications for the following student assistant position:

Student assistant for the development of codes that allow for the retrieval of the lexicon in the Auchinleck Manuscript (coordinators Rory Critten et Davide Picca, SLI) (40%; from 1 February to 31 May 2020)

Tasks:

- L'étudiant-e développera un code qui identifie les mots utilisés dans le manuscrit ayant selon le Middle English Dictionary un lien étymologique au français.
- L'étudiant-e développera un deuxième code qui permettra l'extraction de la première citation de ces mots dans le Middle English Dictionary.
- Il serait possible de prolonger le projet en s'adressant à d'autres lexiques ou en expérimentant avec les codes : est-ce que le Middle English Dictionary peut aussi lire des textes en anglais ou en français modernes, par exemple ?

Who can apply for this SA post and what skills are required?

- 1) The post is open to BA and MA students.
- 2) The post is open to students in English and in the Sciences du langage et de l'information sections.
- 3) The student must have good programming skills and a good knowledge of database technology. Mysql and python will be an asset.

A letter of motivation and CV should be submitted via email to Eva Suarato (secretariat-anglais@unil.ch) by 26 November 2019 at 1pm.

In your letter of motivation, please specify:

If you are applying/have applied for other jobs in the department and/or other departments.

If you plan to be away from campus at any point during the semester (including the Easter week).

The applications will be reviewed by 29 November 2019. Candidates will be informed of the status of their application shortly thereafter.

The names of the successful candidate will be forwarded to the Décanat on Friday 29 November 2019; upon appointment, the candidate will be contacted by the Décanat to complete the hiring procedure.

Please do not hesitate to contact us if you have any questions.

All best wishes,
Anita
