et durabilité

## Post-growth work: Advancing meaningful activities

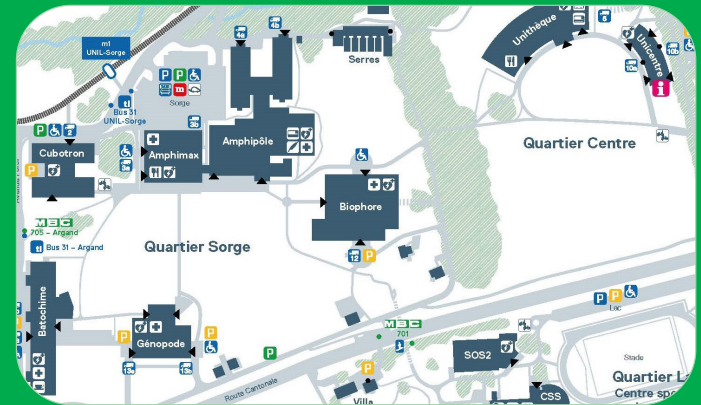

Prof. Dr. Irmi Seidl, head of the economics and social science department at WSL, will discuss the role of work for a post-growth society. Work, both unpaid and paid, is a central part of human life. However, the transition towards an economy within planetary boundaries requires a reconceptualization of the role of work in society and a rebalancing between paid and unpaid work. To this end, it is imperative to rethink work as meaningful activity and to reduce the role of formal employment therein.

The event is open-access, no registration needed. In accordance with the COVID regulations, we ask participants to show a valid COVID certificate upon entry.

### ACCESS

Métro M1 to Lausanne ou Renens (stop UNIL-Sorge)

Paid parking (white zone)
